Impact on score ●●●○

↗ 83/100

Environment | Policies

Impact on score ●●●●

↗ 75/100

A policy is a set of objectives that addresses specific sustainability issues. It shows a company's intention to reduce impact, mitigate risk or improve performance.

Strengths

Environmental policy on energy consumption & GHGs
Environmental policy on product use
Quantitative objectives set on energy consumption & GHGs
Environmental policy on water
Environmental policy on materials, chemicals & waste
Comprehensive policy on a majority of environmental issues

Improvement areas

Medium priority

Inconclusive documentation for policies on customer health & safety

Environment | Endorsements

Impact on score ●○○○

→ 100/100

Endorsements are your company's public adherence or commitment to meeting objectives and principles defined by a recognized third-party organization.

Strengths

- Endorsement of the Aluminium Stewardship Initiative (ASI)
- Endorsement of the United Nations Global Compact (UNGC)

Environment | Measures

Impact on score ●●●●

● ↗ 75/100

Measures are your company’s actions to support your sustainability policies and commitments.

Strengths

Improvement of energy efficiency through technology or equipment upgrades
Training of employees on energy conservation/climate actions
Use of alternative, less hazardous substances in operations
Use of waste heat recovery system(s) or combined heat and power unit(s)
Purchase and/or generation of renewable energy
Energy and/or carbon audit
Actions for labeling, storing, handling and transporting hazardous substances
Environmental emergency measures in place
Training of employees on waste reduction and sorting
Use of recovered input materials
Reduction of internal wastes through material reuse, recovery or repurpose
Internal sorting & disposal of waste according to waste streams
Actions to reduce or eliminate the use and release of Persistent Organic Pollutants
Specialized treatment and safe disposal of hazardous substances
Water audit
Mapping of waste streams
Dedicated feedback channel on health & safety issues of products
Wastewater quality assessment
Technologies or practices to recycle or reuse water
Company awareness program for customers on health & safety issues associated with products/services
Studies on product environmental impact
Design features for easy disassembling, remanufacturing, or recycling of products

Environment | Certifications

Impact on score ●●●○

● → 100/100

Certifications confirm your compliance with international standards (for example, ISO 14001). They must be issued by an external certification body.

Strengths

Environmental management system certification covers more than 75% of the assessed scope
ISO 14001 certified
ISO 50001 certified

Environment | Coverage

Multiplying factor

● 100/100

Coverage means the level of deployment of measures and certifications throughout your company. It’s a multiplying factor. The higher it is, the higher score will be given to the Measures and Certifications indicators.

Strengths

Supporting documents show an exceptional level of coverage of environmental actions or certification throughout company operations
--

Environment | Reporting

Impact on score ●●●○

● ↗ 75/100

Reporting is based on quantitative KPIs that measure your implementation of sustainability practices.

Strengths

Reporting on total energy consumption
Reporting on total weight of waste recovered
Reporting on total water consumption
Materiality analysis in sustainability reporting
Reporting on total weight of hazardous waste
Reporting on total weight of non-hazardous waste
Comprehensive reporting on environmental issues
Reporting on total gross Scope 3 GHG emissions
Total gross Scope 3 GHG emissions reporting value confirmed in supporting documentation
Reporting on total gross Scope 1 GHG emissions
Reporting on total gross Scope 2 GHG emissions (market or location based)
Reporting in accordance with ESRS Set 1
Declares some sites/operations located in or near biodiversity-sensitive areas, but the activities do not negatively affect those areas (not verified)
Reporting on total gross Scope 3 downstream GHG emissions
Total gross Scope 3 downstream GHG emissions value confirmed in supporting documentation
Reporting on total amount of renewable energy consumed
Total gross Scope 2 reporting value confirmed in supporting documentation
Total gross Scope 1 reporting value confirmed in supporting documentation

Improvement areas

Medium priority	Undertake external assurance or verification of your sustainability reporting
Low priority	No information on reporting on total amount of water recycled and reused
Low priority	No information on the percentage of WEEE collected out of total EEE placed on the market

Sekisui Chemical and Tokai Carbon collaborate to effectively utilize CO2 by manufacturing and solidifying carbon products, etc. [JP] www.kankyo-business.jp Apr 2023 Sekisui Chemical and Tokai Carbon formed a partnership on April 18, 2023, to promote the practical use of CCUS technology for CO2 capture, storage, and utilization. They aim to utilize the "chemical looping reaction technology" to convert CO2 to CO efficiently and manufacture carbon materials and products using the CO generated (CCU). They also aim to promote the practical use of CO2 storage and capture technology as solid carbon (CCS).	360° Watch Impact on Score Severity Neutral valid from Apr 2023 to May 2028 

Second Tokai Carbon CB plant certified for sustainable carbon black production

www.tiretechnologyinternational.com | Mar 2023

A Tokai Carbon CB facility in Addis, Louisiana, has been certified to the International Sustainability and Carbon Certification (ISCC) Plus standard, enabling the site to supply sustainable carbon black. The new certification enables the company to provide sustainable carbon black from two of its plants using a mass balance process. The ISCC Plus standard “uses a mass balance approach to enable users of circular and bio-based feedstocks to certify their products corresponding to the amount of these feedstocks consumed”, the company said.
